New Opportunities

Devanshi Parmar

Ahmedabad, Gujarat, India

My journey with ISA together with my faculty advisors and member colleagues has taught me some wonderful lessons that I will cherish. Lots of content and knowledge to acquire. Truly appreciative of this organization that lives up to its reputation, shaping automation and inspiring engineers like us!

New Responsibilities

Bradley Churchman

Houston, Texas, USA

I have even been fortunate enough to attend ISA global events such as the Annual Leadership Conference in Canada which was a great experience to network with ISA members from across the globe. The connections I have formed with other members and the multitude of skills I have learned during my time in ISA has positively impacted my life and has more than adequately prepared me for future internships and careers in automation.

New Connections

Katie White

Edmonton, Alberta, Canada

Being an ISA member has been a great support to me through both my school and early career experience. Making connections with automation professionals has really helped me grow my confidence and skill set as a young professional. Other great things ISA membership offers are access to white papers and standards, as well as scholarship opportunities for students.

Begin the journey to your future as an automation professional.
